

BORA
PORTAMATE

Speedhorse™

When you need to visit multiple worksites a day, you need equipment that's fast and easy to set up, take down, and transfer from one location to another.

The Bora Portamate PM-4500 Speedhorse is the ultimate upgrade for your job site, workspace, or workshop. Shave precious time off site setup and teardown so you can get to work faster and complete jobs more efficiently.

Designed for flexibility in a wide variety of environments, this sawhorse is built tough to withstand heavy projects ranging from construction and carpentry to furniture builds. And when the job is finished, simply pull the levers and fold the legs up — doesn't matter which order.

With the Speedhorse, you can work more quickly and efficiently while continuing to produce professional results.

Quick-deploy and quick-collapse legs

Instant setup is 30x faster than conventional sawhorses. Both setup and teardown take mere seconds.

Best-in-class weight capacity

Each individual unit can support 1500 lbs. — 200 lbs. more than the leading competitors.

Non-sequential leg folding

To tear down your worksite, just pull the levers on each end and fold the legs up — doesn't matter which order.

Long, pre-drilled top

More length means more stability. The pre-drilled metal top allows you to screw in a 2x4 as a sacrificial top, saving your equipment from damage.
