OX[®]

OX PRO LIGHTNING 6-1/2 INCH CIRCULAR SAW BLADE 24-TOOTH

- Unique embedded-tooth design locks each carbide tip deep into the blade, providing superior brazing strength.
- Constructed with hard-wearing M9 carbide, the OX Lightning Blade stays sharper for longer. This means cleaner, faster cuts, extended blade life, and more cuts per battery charge – maximizing both productivity and cordless tool efficiency.
- Each blade undergoes precision roll tensioning, ensuring it runs true on long, deep cuts. This process prevents blade warping under high heat – a critical step skipped by many competitors – delivering consistent accuracy under demanding conditions.
- Engineered with an aggressive hook angle, the Lightning Blade achieves a sharper cutting edge for faster, more efficient cutting. Tradesmen benefit from reduced effort and quicker progress compared to competitor blades.
- The body is heat-tempered to resist stress and minimize warping, giving the blade a longer working life and reliable performance in repetitive wood-cutting tasks. A smooth, protective coating reduces drag and heat build-up, ensuring cleaner cuts, longer-lasting sharpness, and improved efficiency during extended use.
